

# What is the InterPlanetary Superhighway?

Kathleen Howell  
Purdue University

Lo and Ross

# Trajectory → Key Space Technology

**Mission-Enabling Technology**

**Not All Technology is hardware!**

# The InterPlanetary Superhighway (IPS)

- Low Energy Orbits for Space Missions
- InterPlanetary Superhighway—“a vast network of winding tunnels in space” that connects the Sun, the planets, their moons, AND many other destinations
- Systematic mapping properly known as **InterPlanetary Transport Network**

Simó, Gómez, Masdemont / Lo, Howell, Barden / Howell, Folta / Lo, Ross / Koon, Lo, Marsden, Ross / Marchand, Howell, Lo / Scheeres, Villac/ .....

Poincaré (1854-1912)

## Originates with Poincaré (1892)

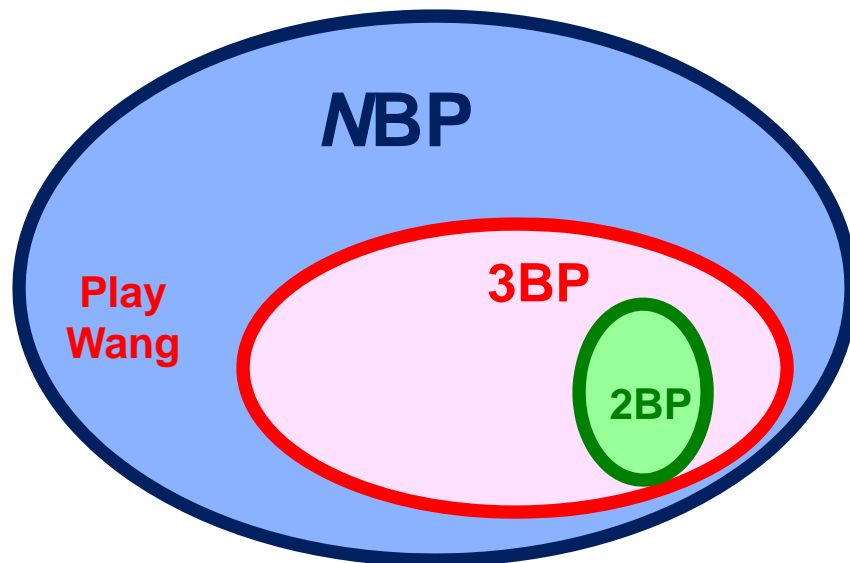

Applications to wide range of fields

Different View of Problems in  $N$ -Bodies

- Much more than Kepler and Newton imagined
- Computationally challenging

“Mathematics is the art of giving the same name to different things”

Jules Henri Poincaré

***New Era in Celestial Mechanics***
